DE RENESTER

**YOU WANT
SPEED AND PRECISION.
YOU'LL LOVE
DE.SY.RE!**

DENESTER

Automatic tub transportation
from De-Nester to Re-Nester.

+ SYSTEM

+ RENESTER

WIDE RANGE OF CONTAINER TYPES

DE.SY.RE is suitable for the handling of syringes, cartridges and vials of various sizes.

GAP COMPENSATION

The split timing screw at the outfeed of the inspection machine compensates for gaps. Only nests that are completely filled leave the process.

The background image shows a large, modern industrial machine. It features a prominent rotating platform with a black top and a silver base. Several inspection stations are visible, each equipped with a camera and a probe. The machine is designed for high-precision inspection of products, likely medical devices like syringes, as evidenced by the syringes shown in the foreground.

RELIABLE REPRODUCIBILITY

Each camera inspects each product regardless of speed.

Identical conditions for each product make results comparable and reproducible.

BEST INSPECTION RESULTS

Individual rotation profiles for each product, up to 24 images per high-resolution camera, automatic re-inspection for defined types of defects, and if requested, high-voltage leak detection: all components are appropriately adapted to any requirement.

EXCELLENT DESIGN

The column concept provides easy access to all machine areas.

Rounded edges enable quick and easy cleaning. Cables and hoses are entirely hidden.

NON-GLASS-TO-GLASS-CONTACT

Syringes do not touch each other in any process step. This prevents container damages and glass breakages, reducing costly downtime.

SMOOTH PRODUCT TRANSPORT

Gentle and smooth product handling minimizes the formation of air bubbles, for best inspection results.

UP TO 36,000 CONTAINERS/HOUR

A high-speed, high-precision delta robot in the de-nester supplies the inspection machine with up to 600 containers per minute.

SEIDENADER
KÖRBER SOLUTIONS

DE.SY.RE in combination with a Seidenader inspection machine: the solution for best inspection results. **TURNKEY. FROM A SINGLE SUPPLIER.**
